APRIL 18-19, 2019 MEDICAL PREPAREDNESS AND RESPONSE TO BOMBING INCIDENTS (MPRBI)

Event Description Heading

This MPRBI course introduces first responders who may be involved in the medical response to an explosive incident to real-world event case studies and research-based information designed to enhance the medical preparedness for and response to blast effects. This course includes a management and planning-level section focused on pre-incident indicators of bombing incidents, bombing incident scene safety and security, and resource management for bombing incidents. The course also includes a performance-level section focused on bombing incident injury patterns and treatment; managing the medical response for bombing incidents; and the planning, training, and exercise cycle for bombing incidents.

Recommended Audience

- Emergency management
- Emergency medical services
- Fire service
- Law enforcement
- Public health care
